MEMORANDUM FOR PROSPECTIVE AIR AND SPACE POWER COURSE PARTICIPANTS

FROM: AU/CC

55 LeMay Plaza South, Suite 120
Maxwell AFB AL 36112-6335

SUBJECT: Air and Space Power Course (ASPC)

Welcome to the Air and Space Power Course! As an Expeditionary Air and Space Force, we need airmen well versed in air and space power principles and beliefs. The ASPC was carefully designed to prepare you to articulate and advocate air and space power principles and beliefs. The course covers Air and Space Power Theory and Doctrine, including Air Force Distinctive Capabilities, Tenets of Air and Space Power, Air and Space Expeditionary Forces, and much more—all in one dynamic, interactive program. I hope this course will help you communicate the unique perspective that operating in the third dimension gives the Air Force.

Because of bandwidth requirements, it is recommended that you take the course at work using your network or a DSL/cable modem-rated connection. If you do not have such a connection available, please send a letter to: CADRE/WSD, 625 Chennault Circle, Suite 221, Maxwell AFB, AL 36112-6428, to request a CD-ROM version of the course. You can complete the surveys and take the final test using any internet connection.

I hope you will take the time to complete the Air and Space Power Course to better prepare yourself as an Air Force professional. As you complete the course, please provide your feedback to CADRE via the built-in post-course survey. Best wishes for your continued professional development.

A handwritten signature in black ink, appearing to read "Donald A. Lamontagne".

DONALD A. LAMONTAGNE
Lieutenant General, USAF
